## Series No. BYTT30/ BYTT60

### Technical Specification:

Manifold Material: Stainless steel

Frame Material: Stainless steel

Insulation: Polyurethane 30mm

### Product description

- (1) Frame
- (2) Model head
- (3) Vacuum tube
- (4) Trail support
- (5) Anti-dust loop
- (6) Water inlet and outlet

### Installation instruction

1. Connect the (1)frames .
2. Fix the (2) model head to the (1) frame with the nut .
3. Insert the (3) vacuum tube into (2) model head.
4. Use the (4) trail support to support the bottom of (3) vacuum tube.
5. Fix the (4) trail support to the (1) frame.

Non pressure-enduring solar energy centre hot water system is a huge matrix of the non pressure-enduring solar energy heater collectors to absorb the solar radiant energy, is a huge environment-friendly centre hot water system. It can supply hot water all day long according to different demands of the customers. The integration of the solar energy and the buildings has become a develop trend for today's solar energy market.

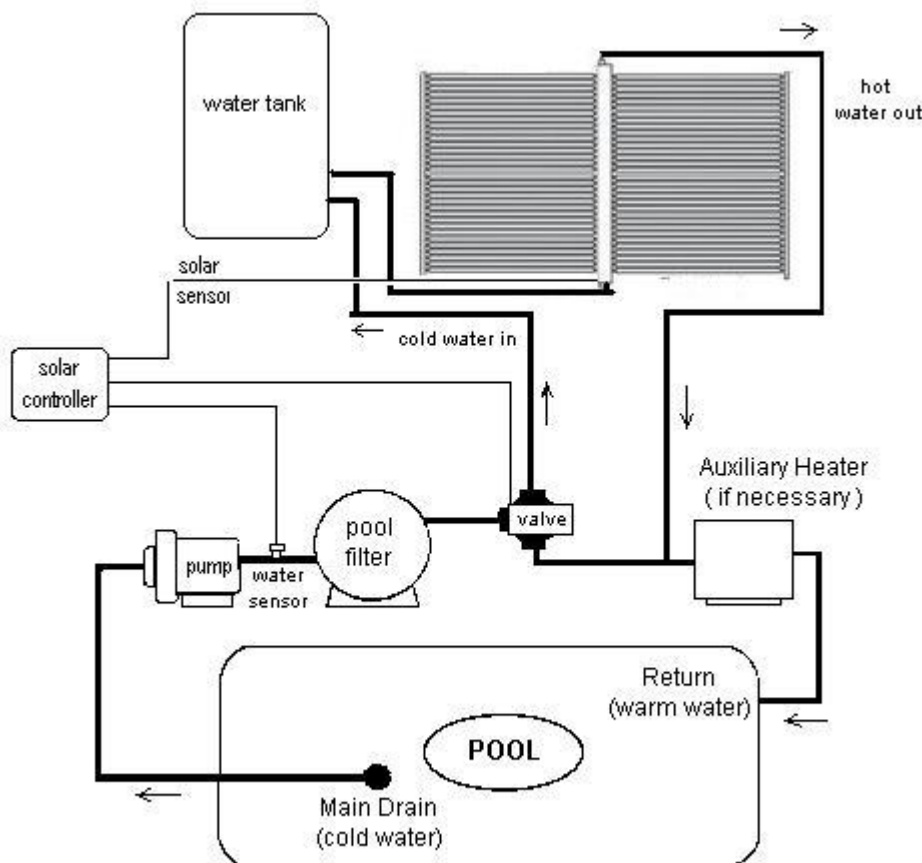

High efficiency: adopt the heat pipe vacuum tube heat collector, high system efficiency. Lasting: the principle, design, technique and fitting parts used in the system all meets the international advanced level, and lifespan can be 20 years long. Integrated with the building. The water tank and the solar energy collectors are separated, integrated with the building, elegant and beautiful.

## Applicable areas:

Swimming pools, daily hot water, public hot water, industry hot water, boiled water warm-up, etc.

The system is also suitable for specific places, such as apartments, hotels, restaurants, schools, government departments, army , rest houses, hospitals, nursing houses, etc.

## SOLAR POOL HEATER – INSTALLATION DIAGRAM

Excellent quality with exceptional affordable price, best market ratio

Solar Pool Heating provides you and your family with a cost-effective and environmentally conscious way to keep your pool warm and inviting even during the winter months. Contrary to common belief, there is enough solar energy, even in the cold Northeast, to warm your pool to summer levels.

Solar Pool Heaters are great for recreational pool use and are recommended for those who are comfortable with pool temperatures ranging from the low to your specific needs. Solar works year round the word.

## You Can Double Your Swimming Season!
